TECH STACK

Java · Python · JavaScript · TypeScript · Kotlin · Spring Boot · Jetpack Compose · Three.js · PostgreSQL · Supabase · Git · Figma · Claude API

LANGUAGES

Spanish: native

English

- Available for freelance projects

PROFILE

I combine two ways of thinking: design, which asks how something feels to use, and engineering, which asks how to make it reliable. That mix is what I bring to every project.

I have built AI web platforms, Android apps, Python desktop systems and voice assistants. I work with layered architecture, design patterns and clear documentation so software stays easy to maintain.

SELECTED PROJECTS

CIVIA AI

AI web and mobile platform

A platform for architecture and civil engineering: projects, AI-reviewed blueprints, 3D modeling, site camera, a technical library and an expert copilot. AI interprets and the professional validates.

Stack: Java 21 · Spring Boot 3.5 · JavaScript · Three.js · PostgreSQL · PWA `civia-black.vercel.app`

AI Wildlife Guardian

Computer vision monitoring center

A tactical control center that recognizes species through the camera, classifies behavior and alerts rangers when it detects an intruder.

Stack: JavaScript · ml5.js · Tailwind · Chart.js · Express · TypeScript `ai-wildlife-guardian.vercel.app`

Time Capsule

Native Android app

Digital time capsules with photos, videos and letters. Share them with family and friends while AI builds summaries, a timeline and a memory map.

Stack: Kotlin · Jetpack Compose · Supabase · WorkManager · osmdroid · ExoPlayer `github.com/NIckys310/timeCapsul`

ChronoLoop

Python desktop application

An interactive analog clock with an alarm where hour, minute and second are nodes of three hand-built circular doubly linked lists. One Python file with a single import.

Stack: Python · tkinter · MVC · Canvas

GIDEON

Voice AI assistant

An assistant inspired by the Waverider ship AI. It has a web command interface and a desktop version that wakes by voice, talks back and remembers conversations.

Stack: Python · Flask · Claude API · PyQt5 · Vosk · Porcupine

EDUCATION

Software Engineering
Universidad Cooperativa de Colombia · In progress

Graphic design
Training in visual design, identity and UI

SERVICES

- UI/UX design
- Web development
- Mobile apps
- AI integrations
